

❤️ CVS, Walgreens, & Rite Aid

are on a mission to become America's largest

ABORTION PROVIDER

THE BACKGROUND

CVS, Walgreens, and Rite Aid are pushing to make millions of dollars by offering dangerous pill abortions to women. This drug **kills an unborn child up to 12 WEEKS** after conception and is **DANGEROUS** for women.

THE DANGER TO WOMEN

1 out of 50 pregnancies are ectopic

Pharmacies are pushing to offer the abortion pill without a in-office doctor visit to ensure a pregnancy is not ectopic. If a woman takes the abortion pill and has such a pregnancy, she could be hospitalized or die.

THE TRAUMA OF ABORTION

How does the abortion pill work?

A woman takes the first pill, Mifepristone, which cuts off nutrients, starving the child to death. The woman then takes a second pill that forces the delivery of her dead child at home. She is directed to give birth to the child on the toilet and flush her down the drain.

THE PROFIT FOR BIG PHARMA

They plan to push abortion at a profit

According to Planned Parenthood, the pill (RU-486) costs between \$500-\$800 dollars, allowing "Big Pharma" to profit on the destruction of human life, often while targeting the poorest and most vulnerable of women.

HELP US PUT PRESSURE ON CVS, Walgreens, & Rite Aid

Take action now before it's too late.
